129719

TABLE OF CONTENTS

		PAGE
Effect of chromium on the growth of unicellular Chlorophyceae and diatoms	*Ralph J. Hervey*	1– 11
Velocities of water absorption by individual root hairs of different species	*H. F. Rosene and A. M. Jockel Walthall*	11– 21
Growth of three varieties of *Lilium* from bulbs stored in vapors of methyl ester of naphthaleneacetic acid	*R. M. Acker*	21– 35
A further study on the nonutilization of rubber as a food reserve by guayule	*H. M. Benedict*	36– 43
Relationship of blue and orange flower-color types in *Nemesia strumosa*	*Herbert Parkes Riley*	43– 52
Effect of sulfanilamide on mitotic division in pollen grains of *Ephedra*	*P. N. Mehra*	53– 63
Incorporation of isotopic carbon into compounds by biosynthesis	*R. H. Burris, P. W. Wilson, and R. E. Stutz*	63– 69
Effects of several plant growth-regulators on wound healing of sugar maple	*Edwin A. Davis*	68– 77
Some effects of the vapor of 2,4-dichlorophenoxyacetic acid derivatives on various field-crop and vegetable seeds	*Wendell R. Mullison and Richard W. Hummer*	77– 85
Effect of application of sugar on the translocation of sodium 2,4-dichlorophenoxyacetate by bean plants in the dark	*Lawrence M. Rohrbaugh and Elroy L. Rice*	85– 89
Preliminary attempts in larch embryo culture	*Clarence Sterling*	90– 94
Synthesis of carotenoid pigments in detached bean leaves	*Robert S. Bandurski*	95–109
Metabolism of radioactive elemental sulfur applied to lemons as an insecticide	*F. M. Turrell and Marcella Chervenak*	109–122
The chlorophyll mutants of maize	*Drew Schwartz*	123–130
Effect of alpha-naphthalene acetamide upon the anatomical structure of cocklebur grown in a nutrient medium deficient in calcium	*B. Esther Struckmeyer*	130–139
The endosperm-embryo relationship in an autonomous apomict, *Taraxacum officinale*	*D. C. Cooper and R. A. Brink*	139–153
Carbohydrate fractions of grapefruit peel	*Walton B. Sinclair and Paul R. Crandall*	153–165
Factors affecting the destruction of carotene in alfalfa	*R. B. Griffith and C. R. Thompson*	165–175
Use of tomato juice in the asymbiotic germination of orchid seeds	*Emil F. Vacin and F. W. Went*	175–183
Application of herbicides to cut stumps of a woody tropical weed	*John G. Torrey and Kenneth V. Thimann*	184–192
Studies in crop physiology: cell-size characteristics of sugarcane varieties in relation to drought resistance	*K. N. Lal and O. N. Mehrotra*	193–210
Embryological studies of two members of the Podostemaceae	*Basheer Ahmed Razi*	211–218
Factors associated with the synthesis of chlorophyll in the dark in seedlings of *Pinus jeffreyi*	*Lawrence Bogorad*	221–241
Action spectrum for the photoperiodic control of floral initiation of the long-day plant *Hyoscyamus niger*	*M. W. Parker, S. B. Hendricks, and H. A. Borthwick*	242–252

		PAGE
Perforation of the surface membranes of nuclei and plastids by nucleodesmata and plastodesmata	*Flora Murray Scott*	252–261
The role of mechanics in the evolution of the herbaceous plant stem	*Reynolds B. Smith*	262–286
Monolith method of root-sampling in studies on succession and degeneration	*J. E. Weaver and John W. Voigt*	286–299
Some evidences for the interaction of tapetal and sporogenous cells in certain vascular plants	*W. N. Steil*	300–306
In vitro culture of the cotton embryo	*Hugh B. Lofland, Jr.*	307–311
Naturally occurring polyploidy in the development of *Albizzia julibrissin* Durazz.	*C. A. Berger and E. R. Witkus*	312–313
Influence of growth "hormones" on boll retention by cotton plants	*Frank M. Eaton*	313–319
Effects of 2,4-D and other growth substances on photosynthesis and respiration in *Anacharis*	*R. O. Freeland*	319–324
Anatomy of the cotton leaf and effects induced by 2,4-dichlorophenoxyacetic acid	*Daniel F. Burton*	325–331
Growth and development of buckwheat under differential temperature gradients	*Wayne C. Hall*	331–343
Breeding for increased ascorbic acid content in tomatoes	*Ralph E. Lincoln, George W. Kohler, Wayne Silver, and John W. Porter*	343–353
Germination and growth inhibitors from Red Kidney bean seed	*S. M. Siegel*	353–356
Age of American coal-ball plants	*James M. Schopf*	356–357
Vivipary in some Chinese plants	*Lai-Yung Li*	358–359
Growth and floral development of five species of range grasses in central Oklahoma	*Elroy L. Rice*	361–377
Internal suberization of tissues	*Flora Murray Scott*	378–394
Comparative histology of naturally parthenocarpic, hormone-induced parthenocarpic, and caprified fig syconia	*Mesut Baskaya and Julian C. Crane*	395–413
Some attempts to estimate species diversity and population density of trees in Amazonian forests	*G. A. Black, Th. Dobzhansky, and C. Pavan*	413–425
Effects of phosphorus deficiency on growth and metabolism of soybean	*Scott V. Eaton*	426–436
Growth-promoting and growth-retarding substances in pollen from diploid and triploid apple varieties	*Poul Larsen and Sin Min Tung*	436–447
A leaf-repression method for evaluation of formative activity of plant growth-regulating chemicals	*James W. Brown and Robert L. Weintraub*	448–456
Artificial dioecism in relation to physiological ontogeny of the gherkin, *Cucumis anguria*	*Wayne C. Hall*	457–470
Complex growth requirement of an argininеless mutant of *Neurospora*	*Adrian M. Srb*	470–476
Response of flowers of Black Corinth and fruit of Thompson Seedless grapes to applications of plant growth-regulators	*Robert J. Weaver and W. O. Williams*	477–485
Recovery and viability of mesquite seeds fed to sheep receiving 2,4-D in drinking water	*G. E. Glendening and H. A. Paulsen*	486–491
Six new plant-growth-inhibiting compounds	*J. W. Wirwille and J. W. Mitchell*	491–494
CURRENT LITERATURE		219, 360
